

NOTICE OF INDEPENDENT REVIEW DECISION

Date: September 16, 2003

RE: MDR Tracking # M2-03-1667-01
IRO Certificate # 5242

___ has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The Texas Workers' Compensation Commission (TWCC) has assigned the above referenced case to ___ for independent review in accordance with TWCC Rule §133.308 which allows for medical dispute resolution by an IRO.

___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, relevant medical records, any documents utilized by the parties referenced above in making the adverse determination and any documentation and written information submitted in support of the appeal was reviewed.

The independent review was performed by an Orthopedic Surgeon physician reviewer who is board certified in Orthopedic Surgery and has an ADL Level 2. The Orthopedic Surgeon physician reviewer has signed a certification statement stating that no known conflicts of interest exist between him or her and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for a determination prior to the referral to for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to this case.

Clinical History

The claimant has a history of chronic back pain following a work compensable injury on ___.

Requested Service(s)

Purchase of RS4i sequential stimulator.

Decision

I agree with the insurance carrier that the requested intervention is not medically necessary.

Rationale/Basis for Decision

Generally long term use of stimulators is appropriate when there has been at least a two (2) months trial to determine effectiveness and significantly increasing range of motion, decreasing use of pain medication, and increasing activities and a decrease in the need for other use of medical services. Prior to initiating the use of a stimulator in the trial a physician should document current range of motion, a current use of pain medications, and current activities the injured worker is able to perform. Prior to any extension of the use these objective factors should be measured again. Furthermore, there should be an explanation as to why long term use is needed. Most pain syndromes diminish over three to four months and long term use is neither cost effective nor necessary. Upon review of all records in the medical file, there is no documentation of a clinical trial with objective measurement or range of motion and functional capacity. Notwithstanding this lack of objective documentation of the above parameters, there's noted to have been a subjective anecdotal documentation of symptoms with the use of a

stimulator from a period of 04/08/03 to 07/22/03 and according to the documentation provided on a patient health report, the patient has not received significant pain relief.

If disputing a spinal surgery prospective decision, a request for a hearing must be in writing, and it must be received by the TWCC Chief Clerk of Proceedings within **10** (ten) calendar days of your receipt of this decision (28 Tex. Admin. Code 142.5(c)).

If disputing other prospective medical necessity (preauthorization) decisions, a request for a hearing must be in writing, and it must be received by the TWCC Chief Clerk of Proceedings within **20** (twenty) calendar days of your receipt of this decision (28 Tex. Admin. Code 142.5(c)).

This decision is deemed received by you 5 (five) days after it was mailed or the date of fax (28 Tex. Admin. Code 102.5(d)). A request for a hearing and a **copy of this decision** must be sent to:

Chief Clerk of Proceedings / Appeals Clerk
P.O. Box 17787
Austin, Texas 78744
Fax: 512-804-4011

The party appealing this decision shall deliver a copy of its written request for a hearing to other party involved in this dispute.
